Who is Wattcoon?

Wattcoon converts unsellable or undervalued power into compute and transforms volatility into predictable income. Delivering instant monetization when traditional markets fail to reward generation.

Why now?

Urgent need for flexible load solutions.

Explosive AI demand meets energy imbalance.

Monetize more, risk less.

Higher ROI from existing assets, reduced exposure to volatility, and stronger long-term positioning.

Two revolutions converge.

Energy is becoming abundant — compute is becoming scarce. Wattcoon bridges the gap.

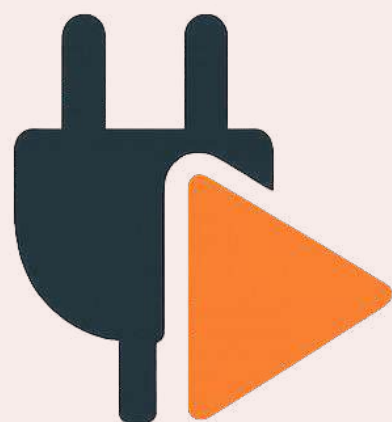

From stranded power to self-monetizing assets.

Every renewable site evolves into an intelligent, decentralized energy-to-compute node.

Simple

Plug & Play

Zero Hassle
for Owners

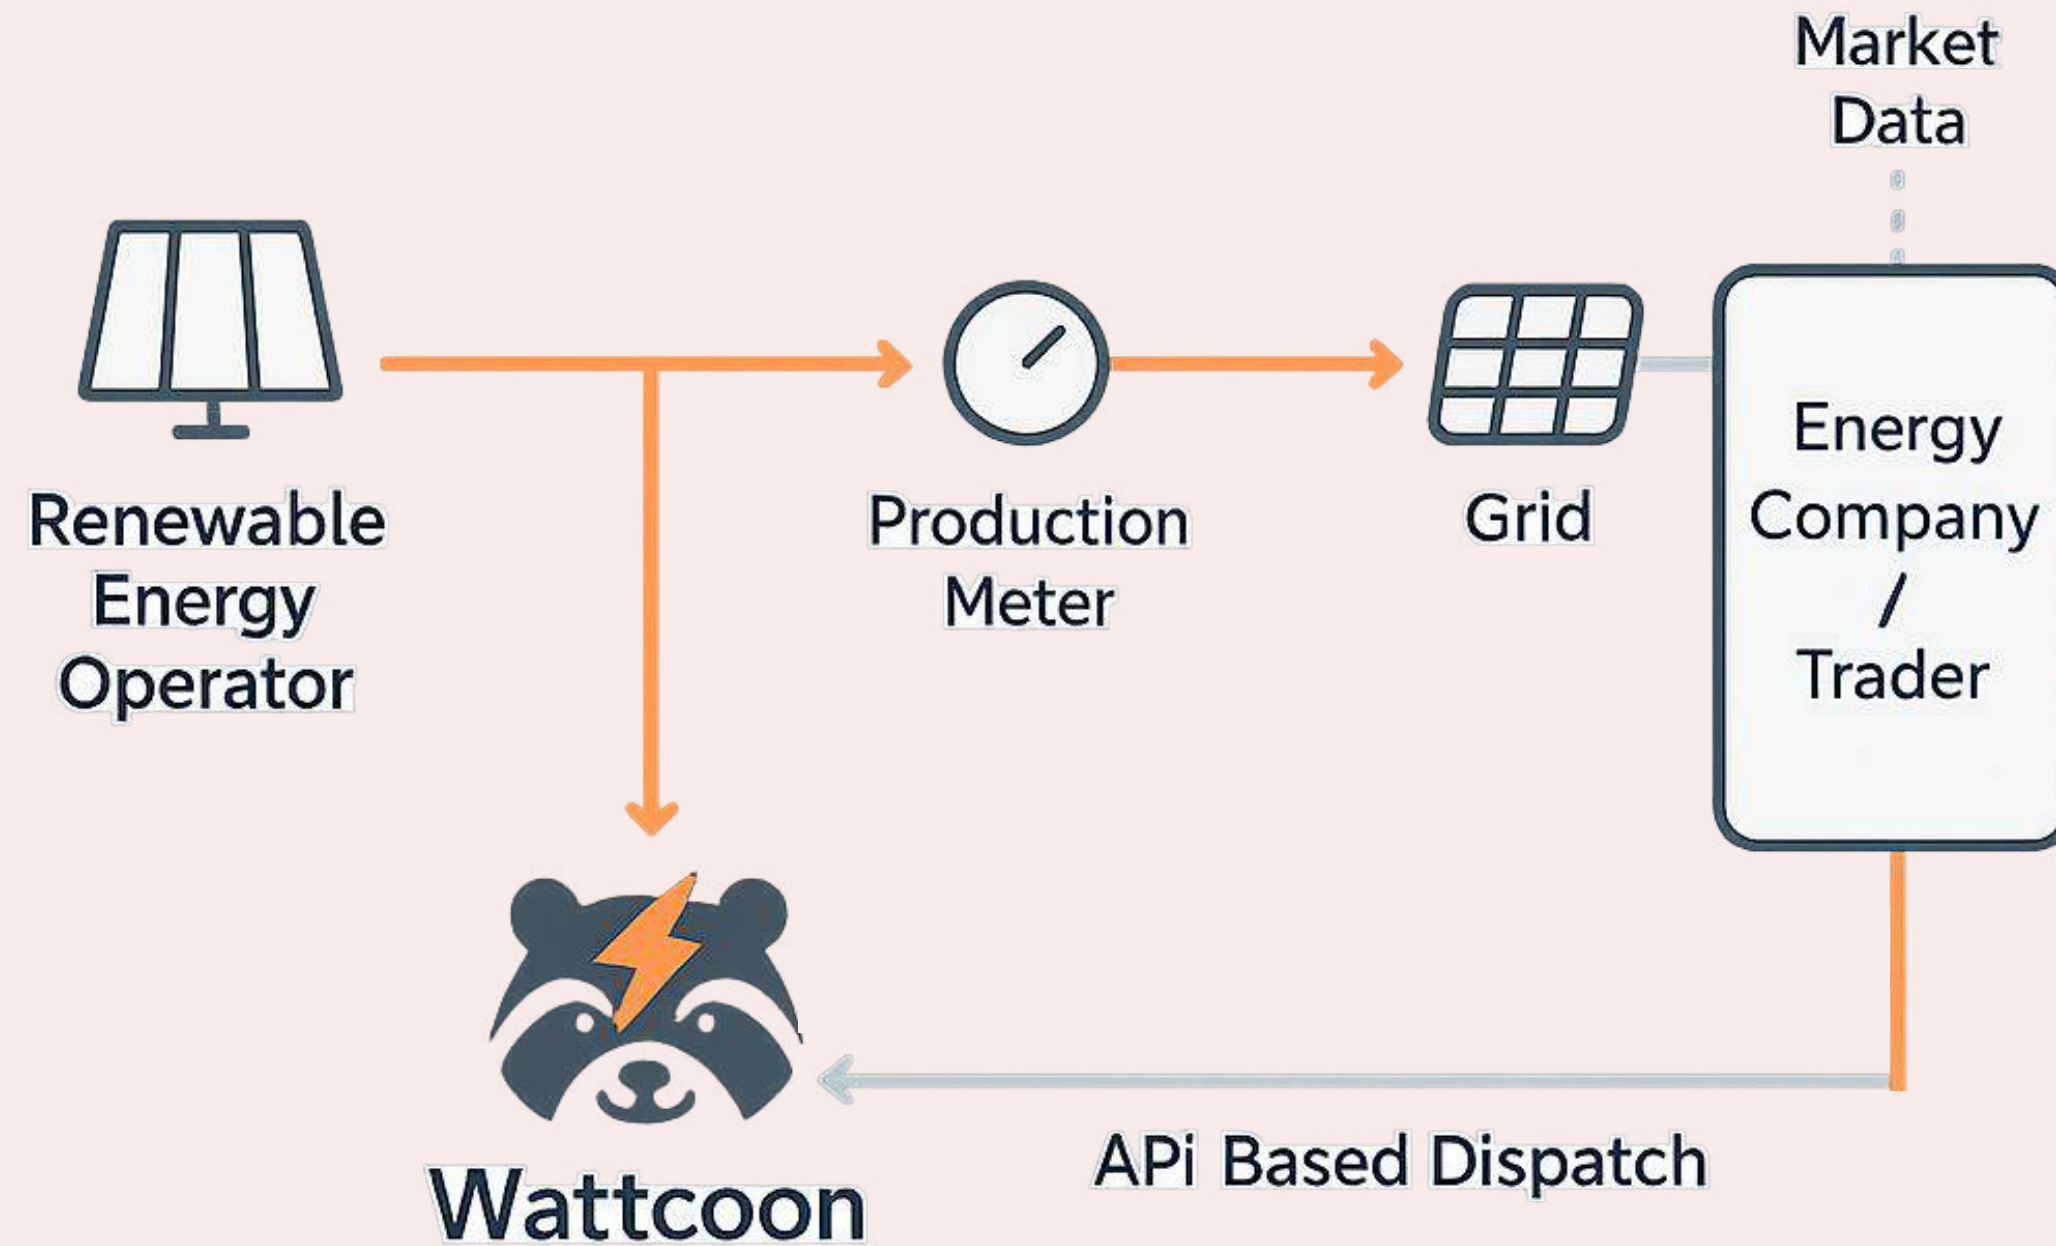

Turn Wasted
Energy into Cash

New Income
Stream

Behind the meter / Operator control

How it connects?

Simple. Direct. Plug-and-Play.

- Connects straight to the **400 V distribution board** of the park.
- **No extra conversion** or transformer required.
- Just one **dedicated rail & 3-phase main switch** ($\approx x \text{ A} / x \text{ MW}$).
- Fully equipped with **internal protection, monitoring, and control**.
- **API-based dispatch** — automatic on/off activation from market signals.
- **Grounding and safety** compliant with grid operator standards.
- Installed on a any **stable, level surface**, ready for placement in 1 day.

→ **Instant integration with existing infrastructure.**
No redesign. No friction.

Financial benefits

- Converts stranded or low-value energy into **predictable cash flow**
- Enhances **hedging flexibility** within existing trading strategies
- Strengthens **revenue stability** against market volatility
- Adds a **new, independent income stream** on top of current operations

From Watts to Wealth — instant monetization through compute made simple

Thank you!

Let Wattcoon unlock the full value of your power.

Turn every Megawatt - stranded or sold too cheap -
into predictable income.

Partner with us to integrate, or scale Wattcoon across
your portfolio.
